

1. Write a program that asks the user for a number and prints whether the number is positive, negative, or zero
2. Write a program that asks the user for their age and prints whether they are eligible to vote (age 18 or older).
3. Write a program that asks the user for two numbers and prints the larger number.
4. Write a program that asks the user for a number and prints whether it is divisible by 5.
5. Write a program that asks the user for their score (out of 100) and prints "Pass" if the score is 50 or above and "Fail" otherwise.
6. Write a program that asks the user for two numbers and an operator (+, -, \*, /). Based on the operator provided, it should perform the corresponding arithmetic operation and print the result.
